

Self Improvement Monitoring

Date; 25th March 2022

Quality Indicator: 1.2 Nurturing Care and Support

Care Standards: 1.27 2.27 3.13

How am I doing?

Very Good—Children are nurtured and supported, their individual needs are met and they benefit from the use of personal plans and all children get the support they need to reach their full potential.

How do I know?

- The children experience warmth, caring and nurturing approaches to personal care. I follow family's personal preferences and promote independence and privacy.
- Where children need support with personal care, it is carried out in a caring manner.
- Children are involved in planning and preparation of meals and snacks.
- We eat together in an unhurried, social & relaxed atmosphere.
- I am focussed on the children while we eat so should an emergency arise I am able to respond immediately.
- Through the use of personal plans I am able to support children while taking all the wellbeing indicators into consideration.
- I regularly communicate with parents via whatsapp, the daily diaries and informal chats at pick up.
- Constant communication with parents ensures effective information sharing.

What am I going to do now?

- Where there are outside agencies involved in the care of a child, I will be more proactive in engaging with them to help identify additional next steps and strategies based on the child's individual needs.
